

EENOVATORS

EAGLES

ENERGY MANAGEMENT PORTAL

Energy management includes planning and operation of energy production and energy consumption units. Objectives are resource conservation, climate protection and cost savings, while the users have permanent access to the energy they need.

Why Choose Eagles?

- **The program has been tested and verified** - Kisima farms and KAPA Oil Refineries Ltd attained their compliance certificates through this program.
- **Real-time monitoring of energy data** will reveal and predict trends and performance allowing the organization to make informed decisions to achieve savings

How it works

The Eenovators Limited team installs all the equipment including smart energy monitors.

An account will be created for the client on the Eagles Portal and access provided to client to monitor energy consumption and track their progress.

Steps?

1

SITE SURVEY

This follows a series of questions or physical site assessment to gauge the number and placement of energy meter(s) required to be deployed at the site.

2

INSTALLATION

The team's qualified technician(s) will carry out the installation of the energy meters on the electrical panels to collect energy data from selected loads.

3

CONFIGURATION

The installed energy meter is set up and connected to the Eagles Energy Management Portal via the internet.

4

REAL-TIME ENERGY MONITORING & ANALYTICS

The installed energy meter collects real-time energy data, which is analyzed by the Eagles Energy Management Portal software.

Eagles Energy Management Portal Features

COMPREHENSIVE ENERGY DATA COLLECTION

We have developed a data gathering and analytics engine that collects client energy use raw data and applies powerful analytics to help our experts identify opportunities for increased efficiency.

COMPREHENSIVE REAL-TIME MONITORING

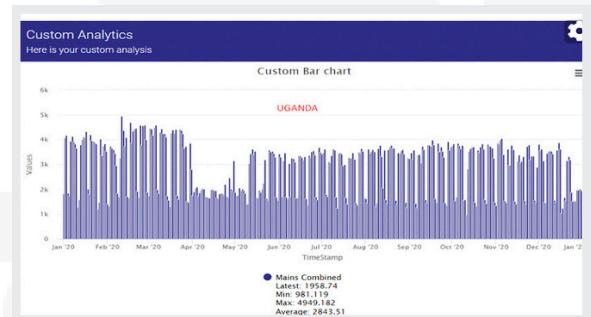

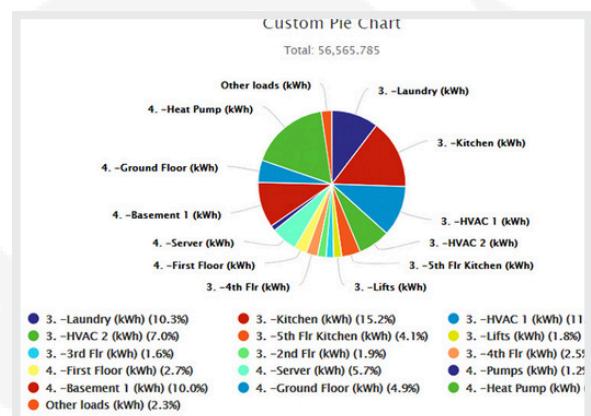

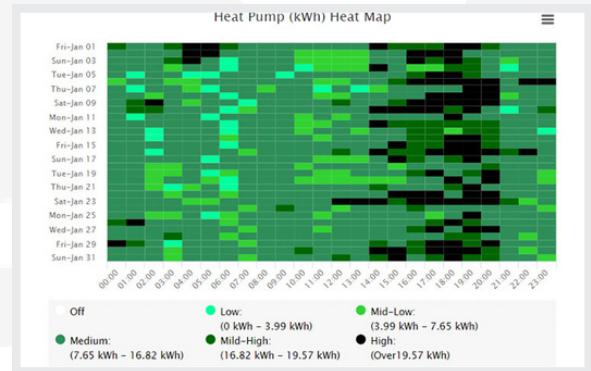

Our intuitive platform closely monitors energy consumption and analyses the data to help our energy engineers provide crucial insights.

GRANULAR POWER QUALITY ANALYTICS

Our platform provides access to granular power quality analytics as requested by the user to help identify potential issues for sustainable solutions.

MACHINE LEARNING-POWERED REPORTS FOR BETTER INSIGHTS

Our platform provides access to powerful python-based machine learning data analysis engines for more insightful analytics crucial for planning.

Eagles Energy Management Portal Features

PROPERLY EXECUTED CLIENT SUPPORT SYSTEM

Our platform provides support for all our clients with each assigned to an experienced energy engineer to provide insight and help on all matters energy.

AUTOMATED AUDIT PROCESS TRACKING

Our platform includes an audit management tool through which our clients can track the audit process and provide the required information for an efficient and comprehensive Energy Audit Exercise.

WELL DESIGNED SITE MANAGEMENT ON MATTERS ENERGY RELATED

Our platform provides excellent distinction for easier management of specified sites on energy management processes.

Packages

BRONZE

- Monthly Energy Consumption Reports

SILVER

- Customized Monthly Energy Consumption Reports
- Access to the online portal

GOLD

- Customized Monthly Energy Consumption Reports
- Online portal access
- Energy Consultancy Services
- Implementation Reporting on an annual signup
- Complementary Energy Audit on a three year signup
